DETAILED ACTION

Election/Restrictions

The previous election of species requirement is hereby withdrawn in view of the traverse filed 10/26/05.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20, line 3, has no antecedent basis for "the call center"

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 10-15 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-operative subject matter. The claimed invention needs to recite a computer "readable" medium in the preamble in order to perform the manipulation of a computer program code.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims s 1-6 and 8-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Allison'326.

The patent to Allison discloses a mobile vehicle 110 with a telematics module 120 and call center 120. The telematics module has memory 128. As recited in column 4, call center 180 can determine telematic module identifiers and mobile identifiers to confirm identification of the system (also see claim 10). As recited in column 5, lines 29-38, the device can use a dummy VIN to test the electronic module 114 and telematics unit 120.

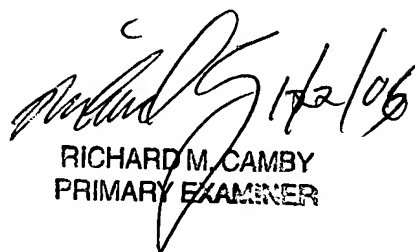

Allowable Subject Matter

Claim7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
